

CLIENT: KEBONY
Hoffsveien 48
Oslo, Norway N-0377

Test Report No: RJ3692-1

Date: January 7, 2015

SAMPLE ID: The Client submitted and identified the following test material as Kebony Southern Yellow Pine.

SAMPLING DETAIL: Test samples were submitted to the laboratory directly by the client. No special sampling conditions or sample preparation were observed by QAI.

DATE OF RECEIPT: Samples were received on December 12, 2014.

TESTING PERIOD: January 7, 2015.

AUTHORIZATION: Testing authorized Stig Lande.

TEST REQUESTED: Perform standard flame spread and smoke density developed classification tests on the sample supplied by the Client in accordance with ASTM Designation E84-14, "Standard Method of Test for Surface Burning Characteristics of Building Materials". The foregoing test procedure is comparable to UL 723, ANSI/NFPA No. 255, and UBC No. 8-1.

TEST RESULTS:	<u>Flame Spread</u>	<u>Smoke Developed</u>
	65	300

For detailed results see page 2.

CONCLUSION: The submitted material meets the requirements for a "Class B" Flame Spread. See classification requirements on page 2.

Senior Technician

PREPARATION: The sample material was submitted in sufficient quantity to form a specimen, 24 inches wide by 24 feet long.

CONDITIONING: The test specimen was conditioned to a constant weight at a temperature of $73.4 \pm 5^\circ \text{F}$ ($23 \pm 2.8^\circ \text{C}$) and a relative humidity of $50 \pm 5 \%$.

CEMENT BOARD PLACEMENT: The 1/4" cement boards were placed between the test specimen and the chamber lid

E 84 TEST DATA SHEET:

CLIENT: KEBONY **DATE:** 01/07/15

SAMPLE: Kebony Southern Yellow Pine.

FLAME SPREAD:

IGNITION: 1 minute

FLAME FRONT: 19.5 feet maximum

TIME TO MAXIMUM SPREAD: 7 minutes, 5 seconds

TEST DURATION: 10 minutes

CALCULATION: $4900 / (195 - 122.21) = 67.32$

SUMMARY: FLAME SPREAD: 65 **SMOKE DEVELOPED:** 300

SUMMARY OF ASTM E84 RESULTS: Because of the possible variations in reproducibility, the results are adjusted to the nearest figure divisible by 5. Smoke Density values over 200 are rounded to the nearest figure divisible by 50.

In order to obtain the Flame Spread Classification, the above results should be compared to the following table:

<u>NFPA CLASS</u>	<u>IBC CLASS</u>	<u>FLAME SPREAD</u>	<u>SMOKE DEVELOPED</u>
A	A	0 through 25	Less than or equal to 450
B	B	26 through 75	Less than or equal to 450
C	C	76 through 200	Less than or equal to 450
